Portfolio: github.com/Mohansingh-bit/portfolio

Summary

A motivated and detail-oriented Computer Science graduate with a strong foundation in Python, SQL, and web technologies. Experienced in developing scalable applications through academic projects and hands-on training. Passionate about learning emerging technologies like machine learning and artificial intelligence, and eager to apply knowledge in real-world problem solving. Committed to continuous growth and ready to contribute as a reliable team player while developing into a skilled professional.

Technical Skills

Programming Languages: Python, C, JavaScript

Python Libraries & Frameworks: Pandas, Flask, SQLAlchemy, WTFORMS, Tkinter, Turtle, Matplotlib, Seaborn, Plotly

Web Technologies: HTML, CSS, JavaScript, Bootstrap5

Database Management: MySQL, PostgreSQL

Automation & Tools: Selenium WebDriver, Git, GitHub

Other Skills: REST APIs, OOP, Fundamentals of Machine Learning, Problem Solving, Analytical Thinking

Projects

Password Manager (Python, Tkinter) |

github.com/Mohansingh-bit/password-manager-python

- Developed a desktop app with Tkinter GUI for generating, saving, and retrieving passwords using local JSON storage
- Built a random password generator (letters + symbols + numbers) with one-click clipboard copy using pyperclip
- Implemented file handling with try/except blocks to manage missing or corrupted data files gracefully

Superstore Sales Analysis (Python, Pandas, Matplotlib, Seaborn, Plotly) |

<https://github.com/Mohansingh-bit/Superstore-Sales-Analysis>

- Performed EDA on a 1,000+ row retail dataset — cleaned missing values, removed duplicates, and extracted key business insights
- Built 4 visualizations using Matplotlib, Seaborn, and Plotly

including an interactive scatter chart for sales vs profit

- Identified top performing categories, regions, and sub-categories and exported a structured summary report to CSV

Cafe Finder REST API (Python, Flask, SQLAlchemy, SQLite) | <https://github.com/Mohansingh-bit/Cafe-Finder-REST-API>

- Built a fully functional REST API with Flask exposing 6 endpoints covering all HTTP methods — GET, POST, PATCH, and DELETE
- Designed a SQLite database using SQLAlchemy ORM with a Cafe model storing 10+ attributes including location and amenities
- Implemented API key authentication on the DELETE endpoint and correct HTTP status codes (200, 403, 404) across all routes
- Serialised database objects to JSON using a custom to_dict() method for clean, consistent API responses

Cafe & Wifi Finder — Web App (Python, Flask, WTForms, Bootstrap5) |

github.com/Mohansingh-bit/flask-cafe-wifi-finder

- Built a Flask web application allowing users to submit and browse cafes with ratings for coffee, wifi, and power sockets
- Created a WTForms form with input validation (DataRequired, URL validator) and Bootstrap5 styling for a responsive UI
- Stored submitted cafe data persistently in a CSV file and rendered it dynamically in a table using Jinja2 templates

Snake Game (Python, Turtle, OOP) |

github.com/Mohansingh-bit/python-snake-game

- Designed and built a complete Snake game using OOP principles, structured across 5 classes (Snake, Food, Scoreboard, RestartButton, Food) in separate modules
- Implemented persistent high score tracking by reading and writing to a local text file across game sessions
- Added sound effects for eating and collision events, a clickable restart button, and a start screen with game instruction

Certifications & Training

Samsung Innovation Campus (SIC):

Project-based training in Artificial Intelligence, focusing on building predictive models using machine learning algorithms.

Ducat Industrial Visit on Data Analytics:

Gained practical exposure to data analytics tools, techniques, and industry use cases.

TCA Training & Development:

Completed a workshop on Neural Networks and explored applications using TensorFlow

Education

Bachelor of Computer Applications

(BCA) Noida International University,
Greater Noida Year of Graduation: 2025

Higher Secondary Education (12th)

Kendriya Vidyalaya, Noida
Year of Completion: 2022

Secondary Education

(10th) Kendriya Vidyalaya,
Noida Year of Completion:
2020
